1. Corvin's Sloop

File: 01-sloop.png

Turn this star diagram into a constellation drawing. Corvin's Sloop: a small single-masted sailing sloop seen from the side, sailing to the RIGHT: the bow is the sharp point on the right, the stern is the left end. The long narrow outline of stars is the hull and the sail. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

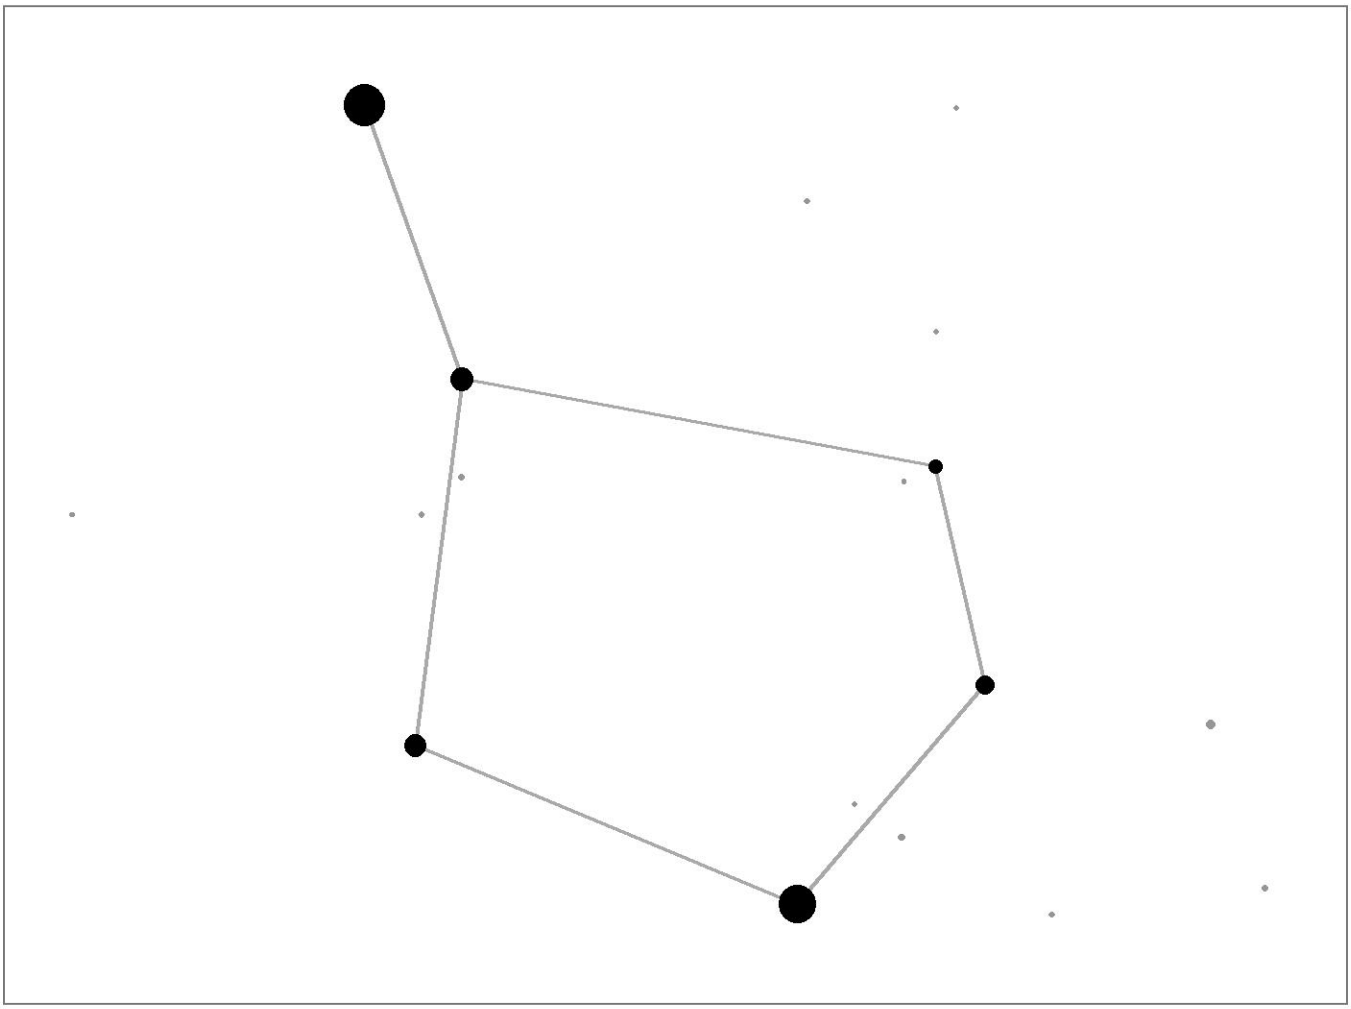

2. Widow's Grief

File: 02-widows-grief.png

Turn this star diagram into a constellation drawing. Widow's Grief: a grieving widow kneeling, seen from the side. In this picture she is UPSIDE DOWN: her shins and knees are along the short hook at the TOP, her body runs DOWN the long line, her head is the bright star at the BOTTOM, and her two arms reach on downwards and to the side, raised in prayer. Long dress and veil. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

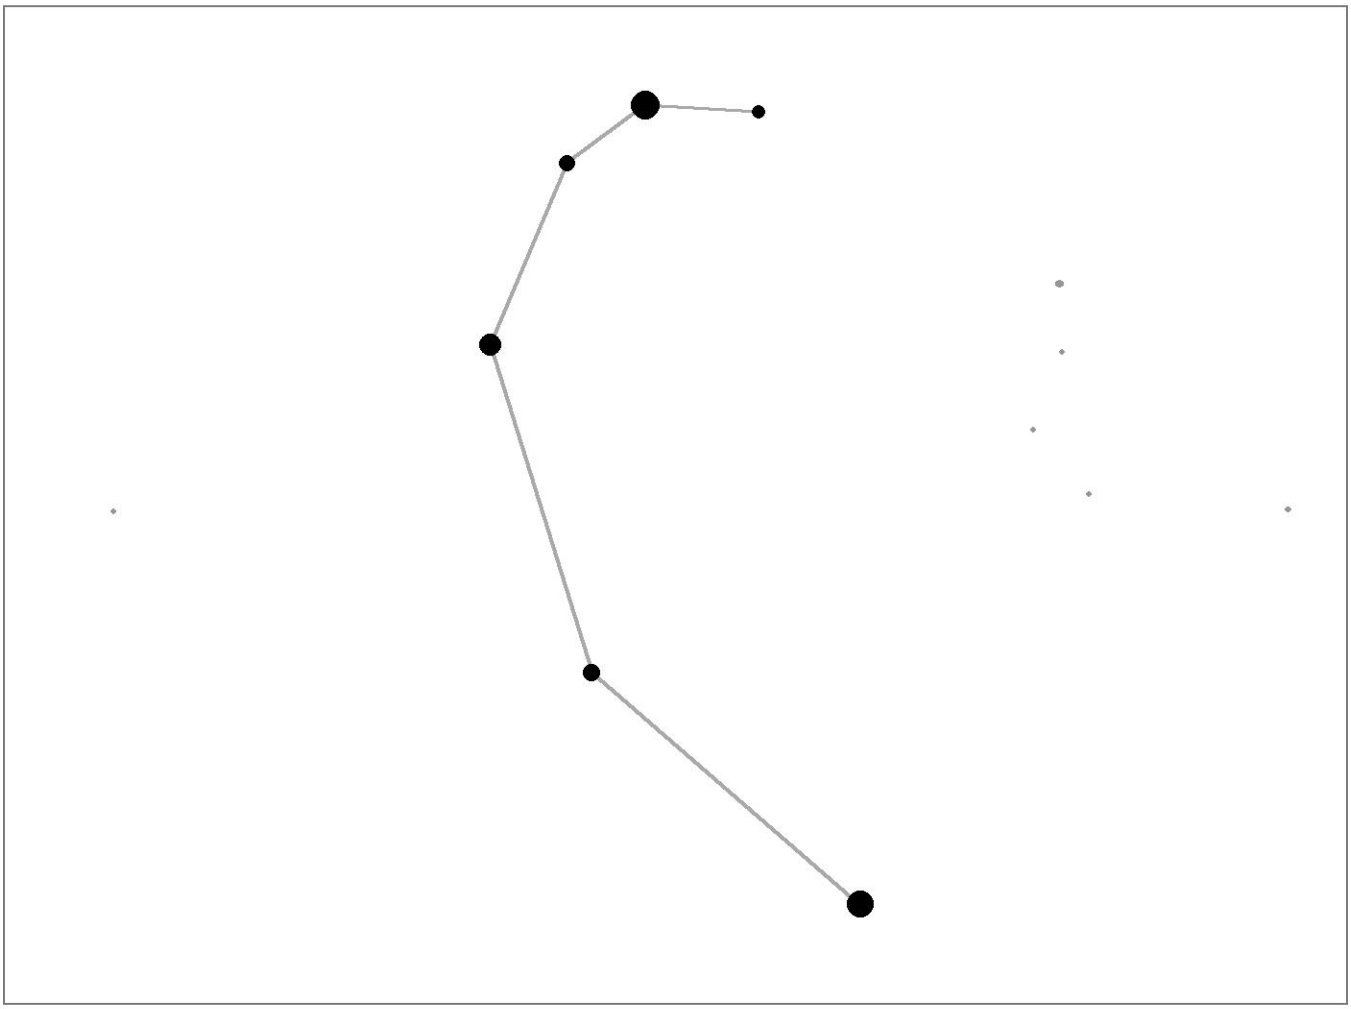

3. Morvath's Maw

File: 03-morvaths-maw.png

Turn this star diagram into a constellation drawing. Morvath's Maw: the wide-open jaws of a huge sea monster (part serpent, part whale), teeth showing, the loop of stars is the gaping mouth. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

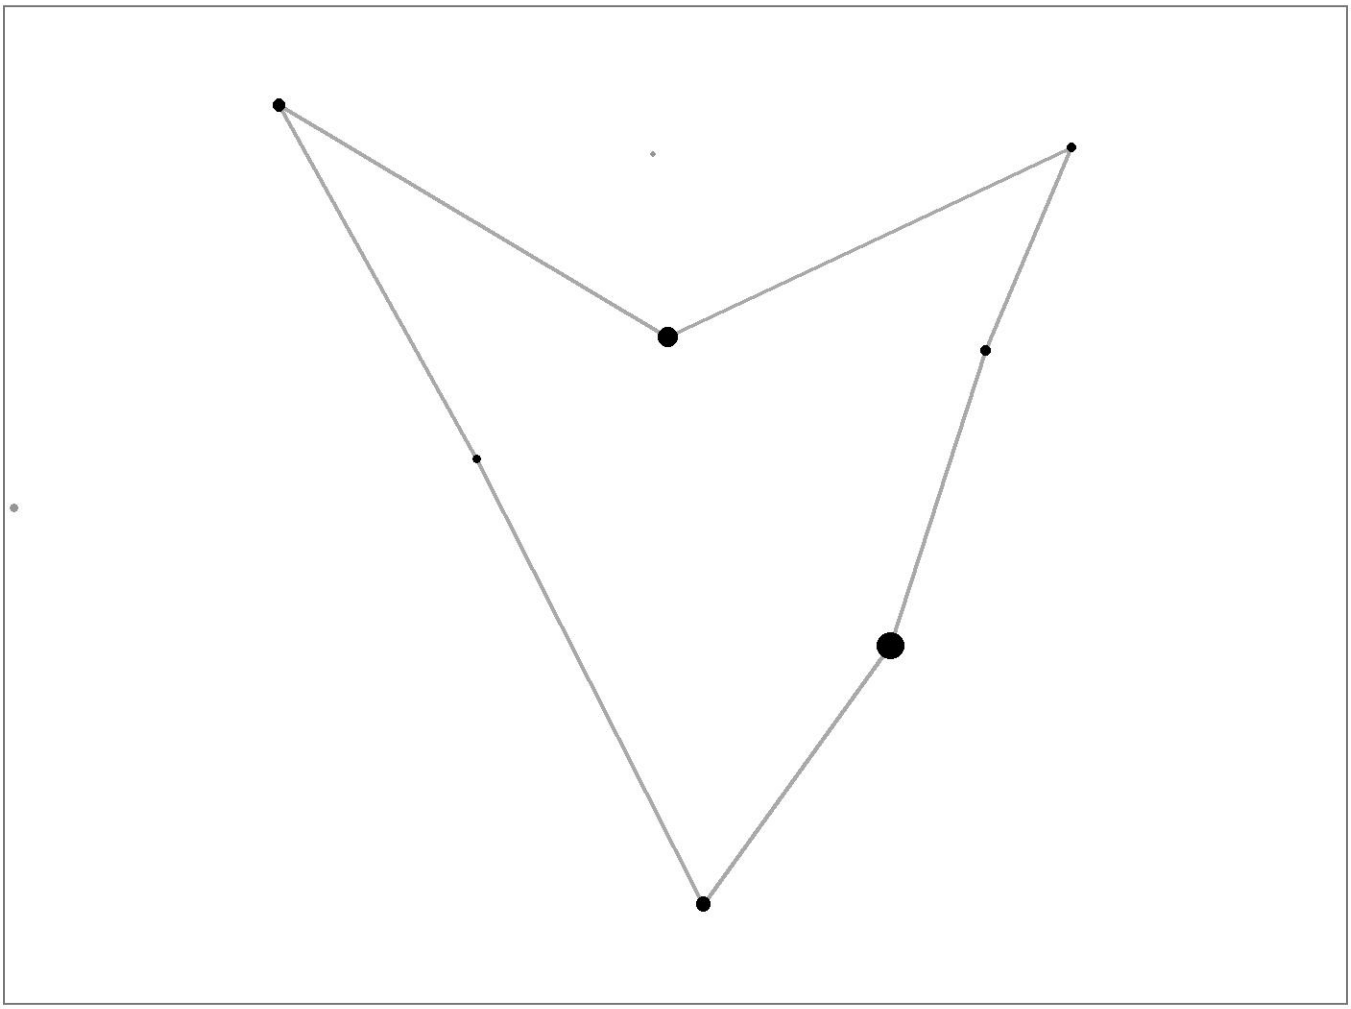

4. The Northern Bow

File: 04-northern-bow.png

Turn this star diagram into a constellation drawing. The Northern Bow: an old wooden longbow, the curved line of stars is the bow itself; draw the bowstring as a thin line between its two ends. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

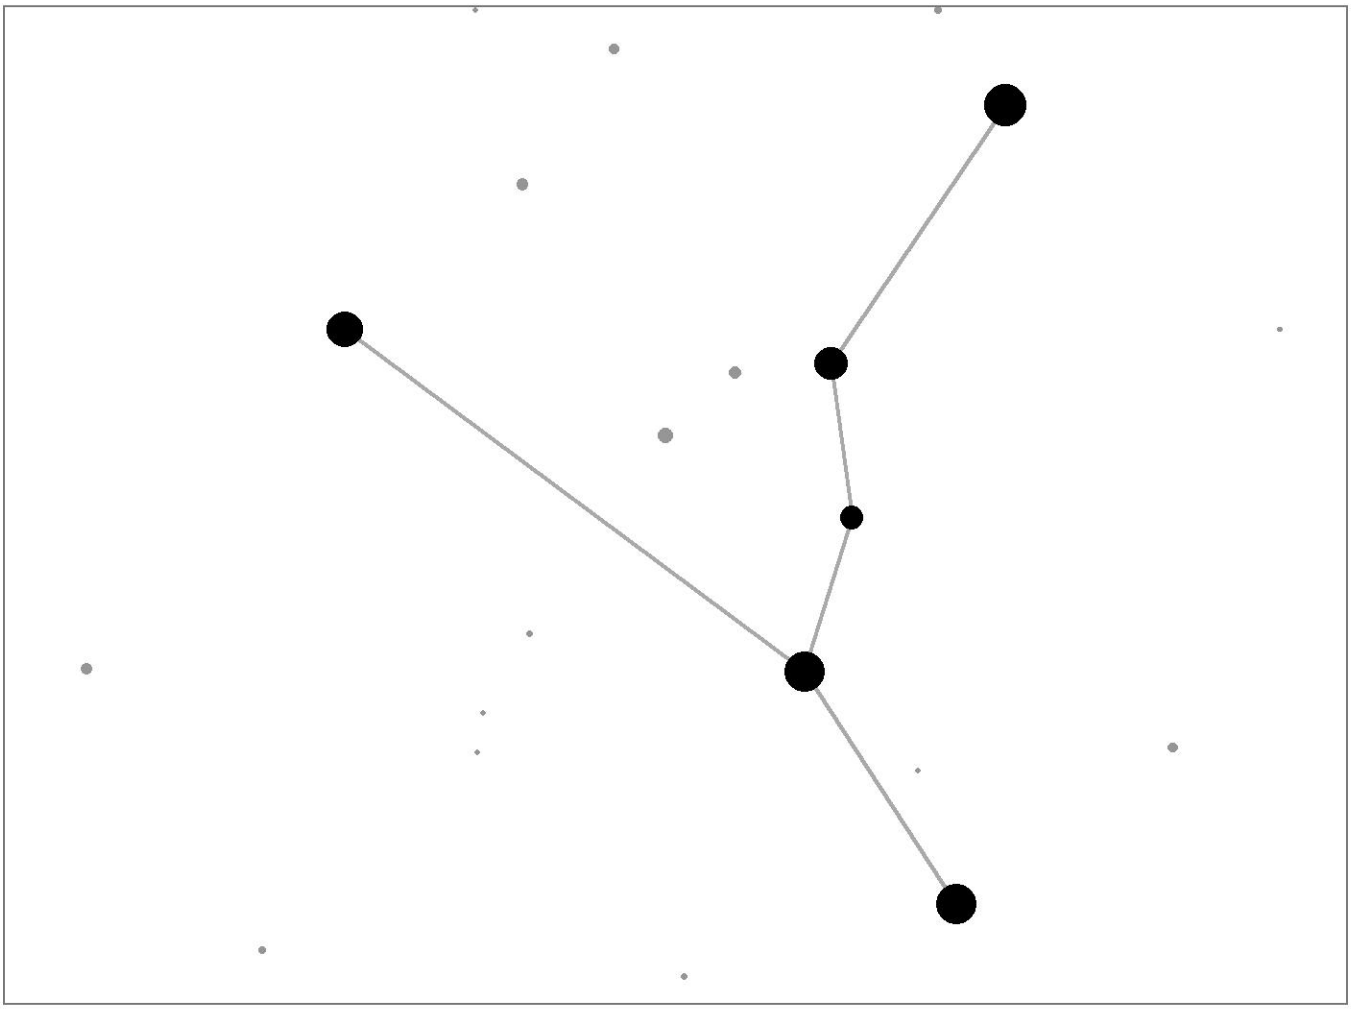

5. The Arrowhead

File: 05-arrowhead.png

Turn this star diagram into a constellation drawing. The Arrowhead: a knapped flint arrowhead with a notched base; the star outline is its edge, the point is at the bottom. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

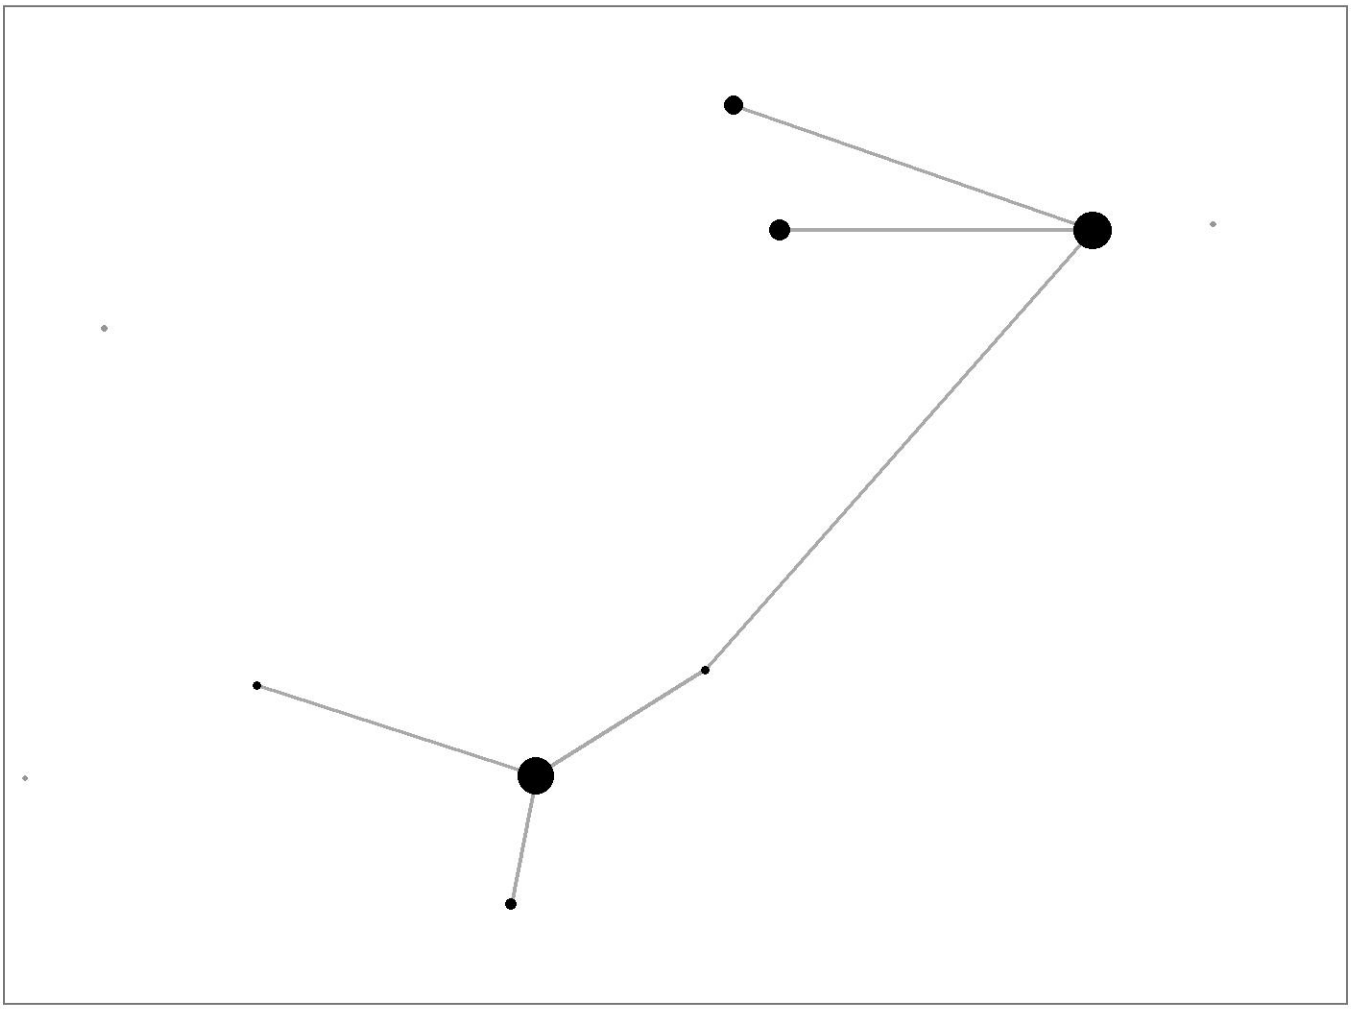

6. The Harpoon

File: 06-harpoon.png

Turn this star diagram into a constellation drawing. The Harpoon: an old iron whaling harpoon on a wooden shaft. The bright star at the TOP is the end of the shaft (with a rope ring), the shaft runs straight DOWN to the iron point at the bottom, and the short side line is the backward-pointing barb. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

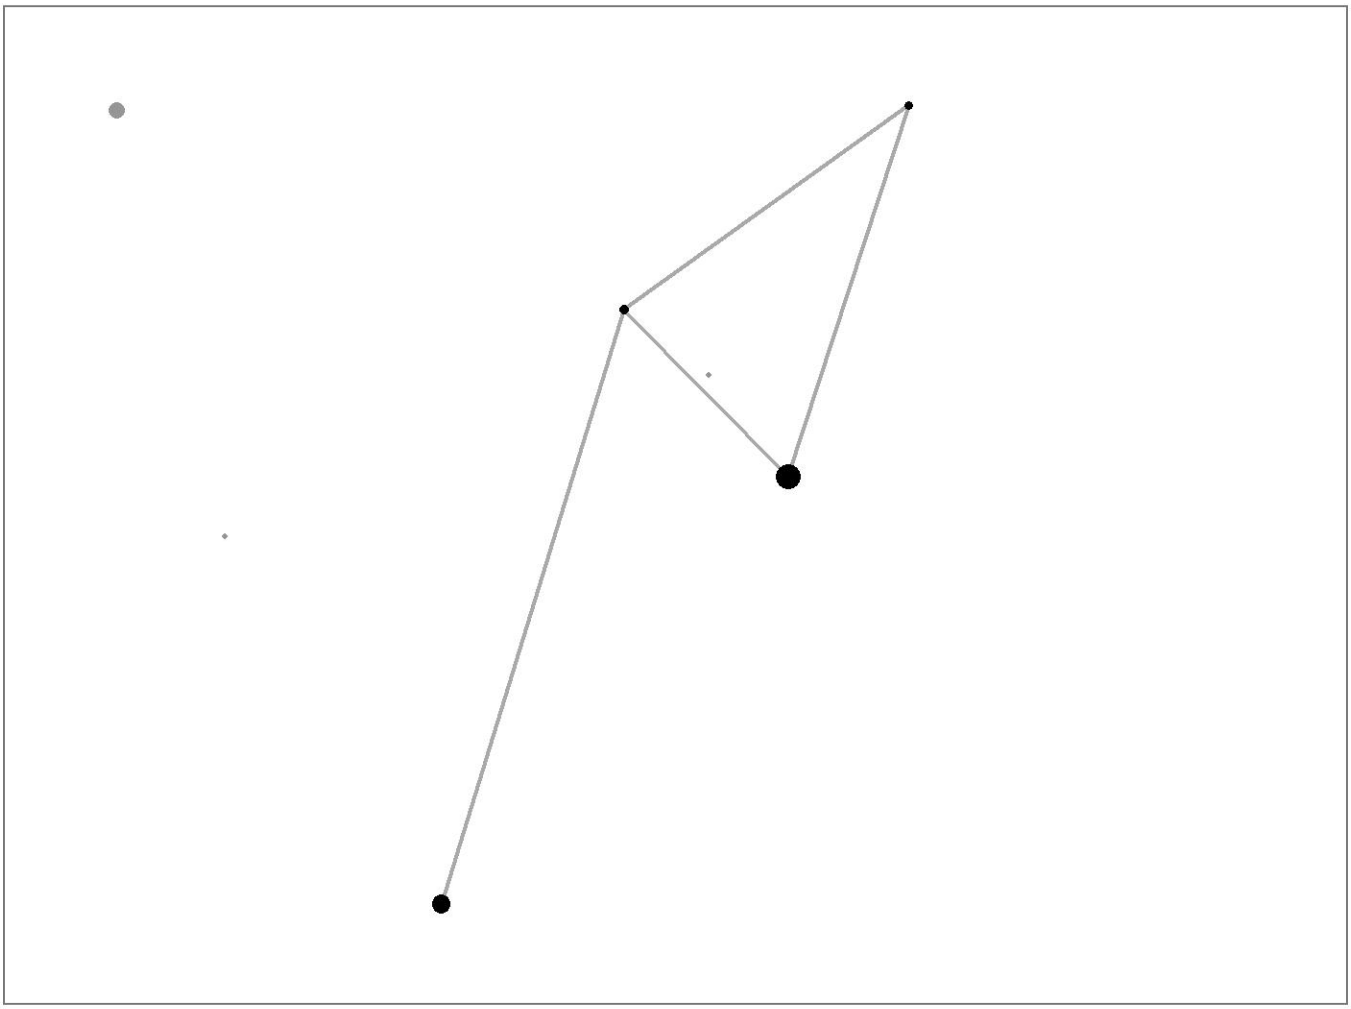

7. The Ship's Cat

File: 07-ships-cat.png

Turn this star diagram into a constellation drawing. The Ship's Cat: a cat peeking over a ship's rail, head at the TOP-RIGHT bright star with two paws reaching out beside it, body running down to the lower star where her hind legs part. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

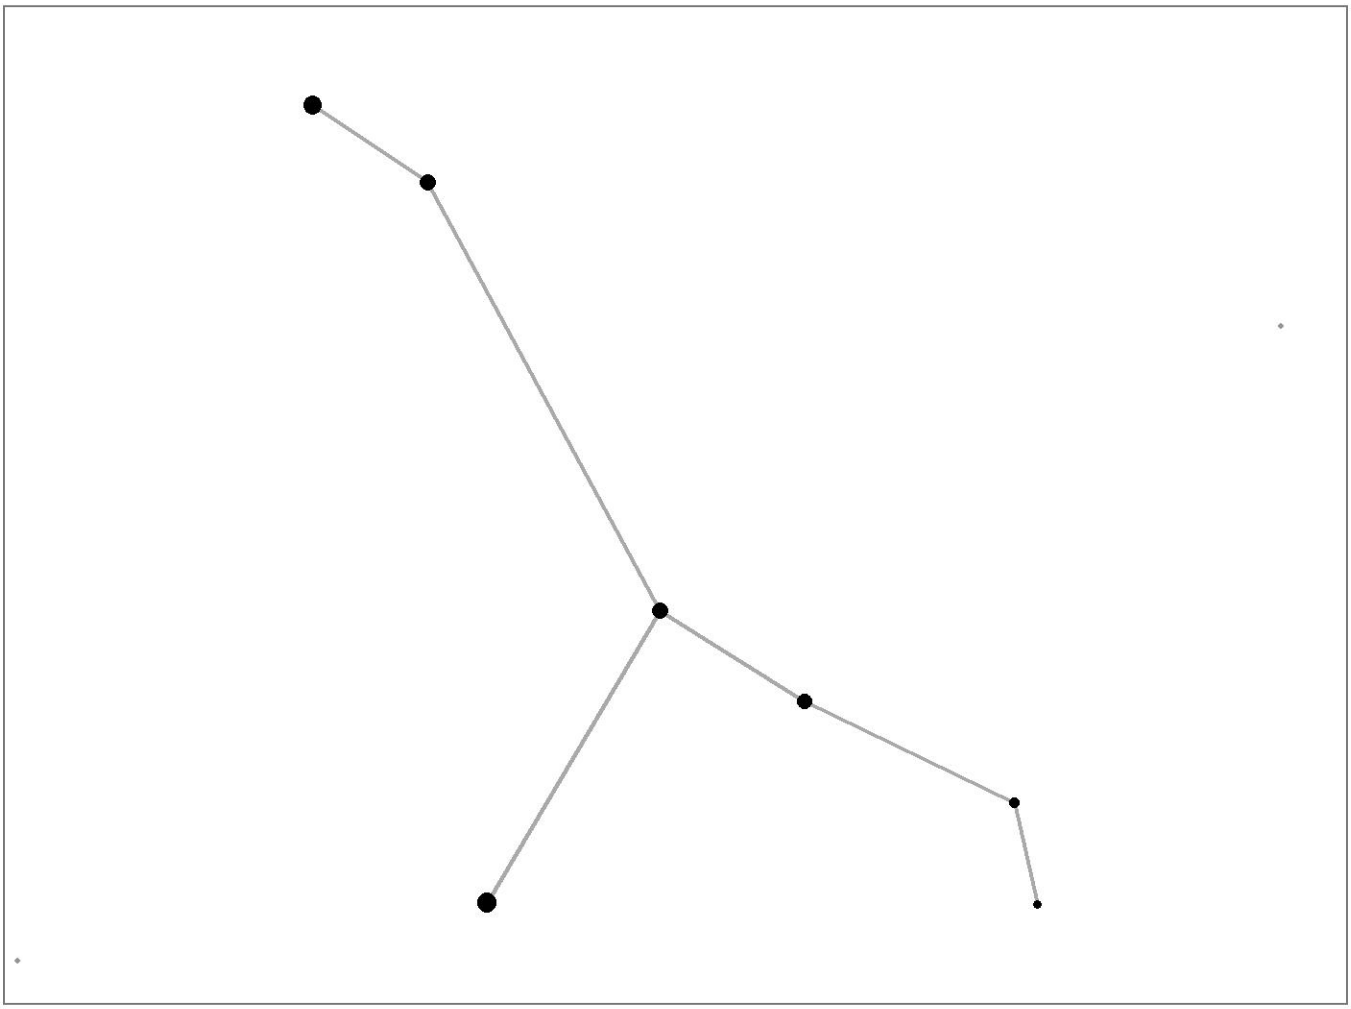

8. The Mouse

File: 08-mouse.png

Turn this star diagram into a constellation drawing. The Mouse: a little mouse scurrying away, body in the small triangle, long thin tail trailing down along the long line, a biscuit in its mouth. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

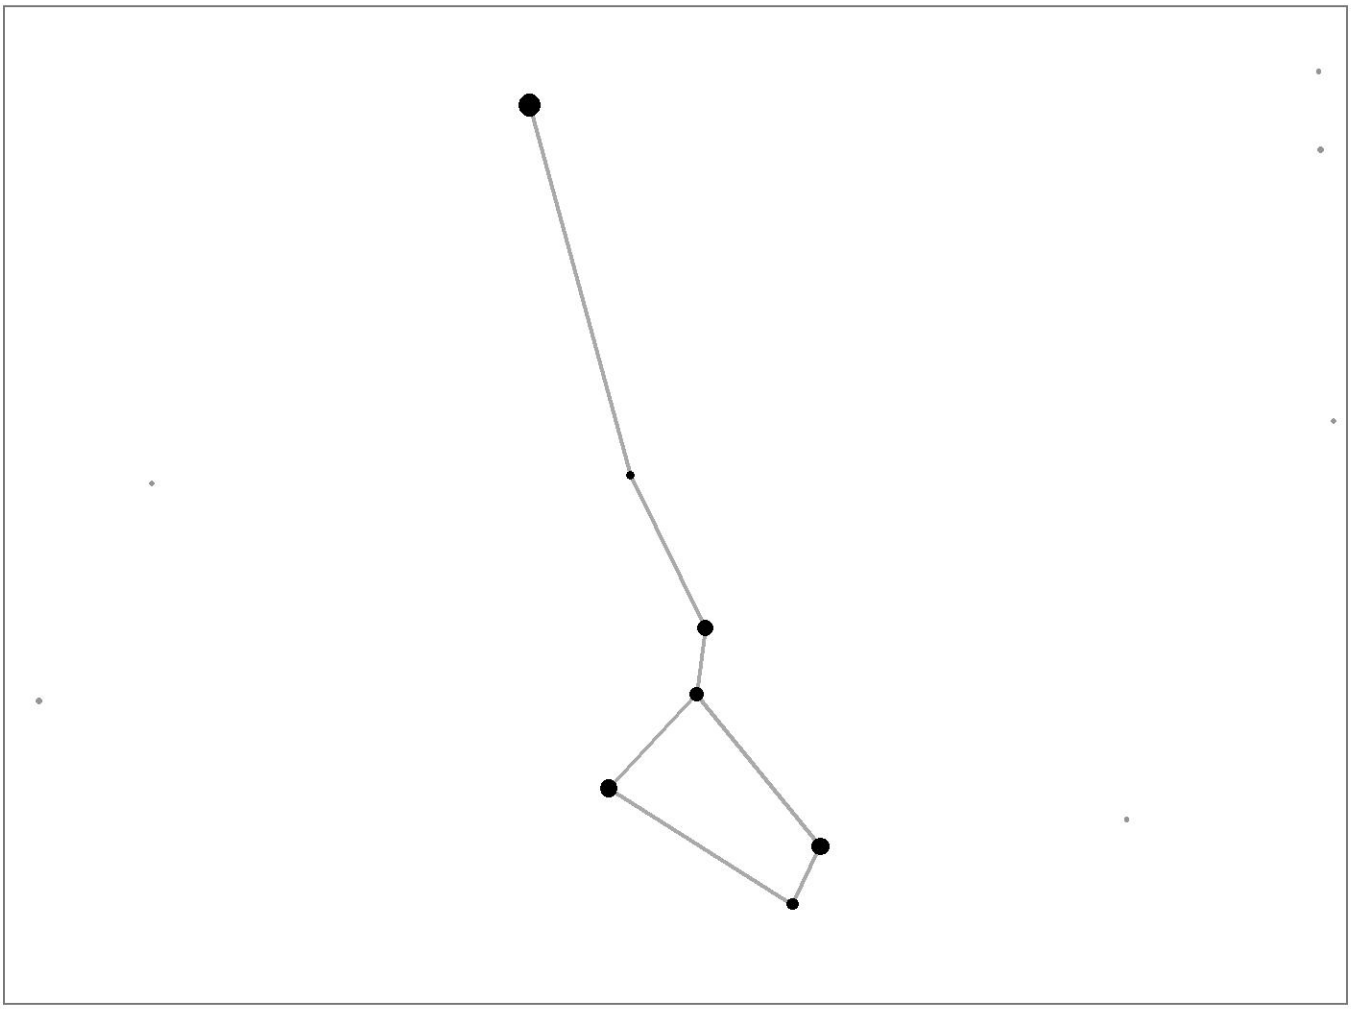

9. The Gull

File: 09-gull.png

Turn this star diagram into a constellation drawing. The Gull: a seagull with wings spread wide, one wing reaching up, the other out to the side with a small hook at its tip, short tail at the bottom. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

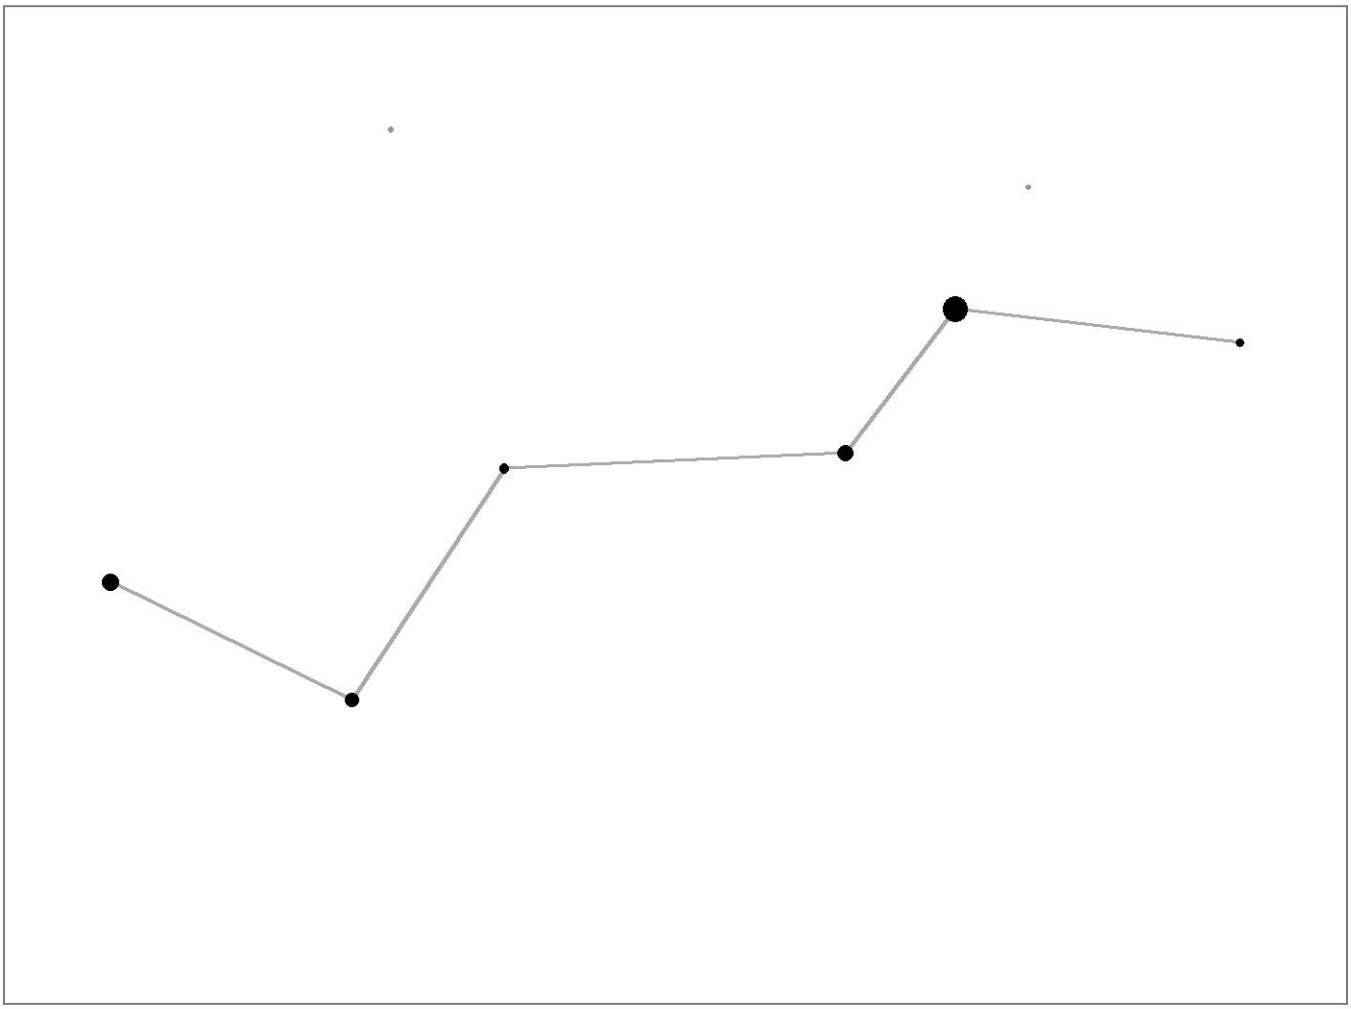

10. The Pipe

File: 10-pipe.png

Turn this star diagram into a constellation drawing. The Pipe: a sailor's long-stemmed clay tobacco pipe: small bowl at the bottom (the four-sided group of stars), long straight stem running up to the mouthpiece at the top. A thin curl of smoke from the bowl. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

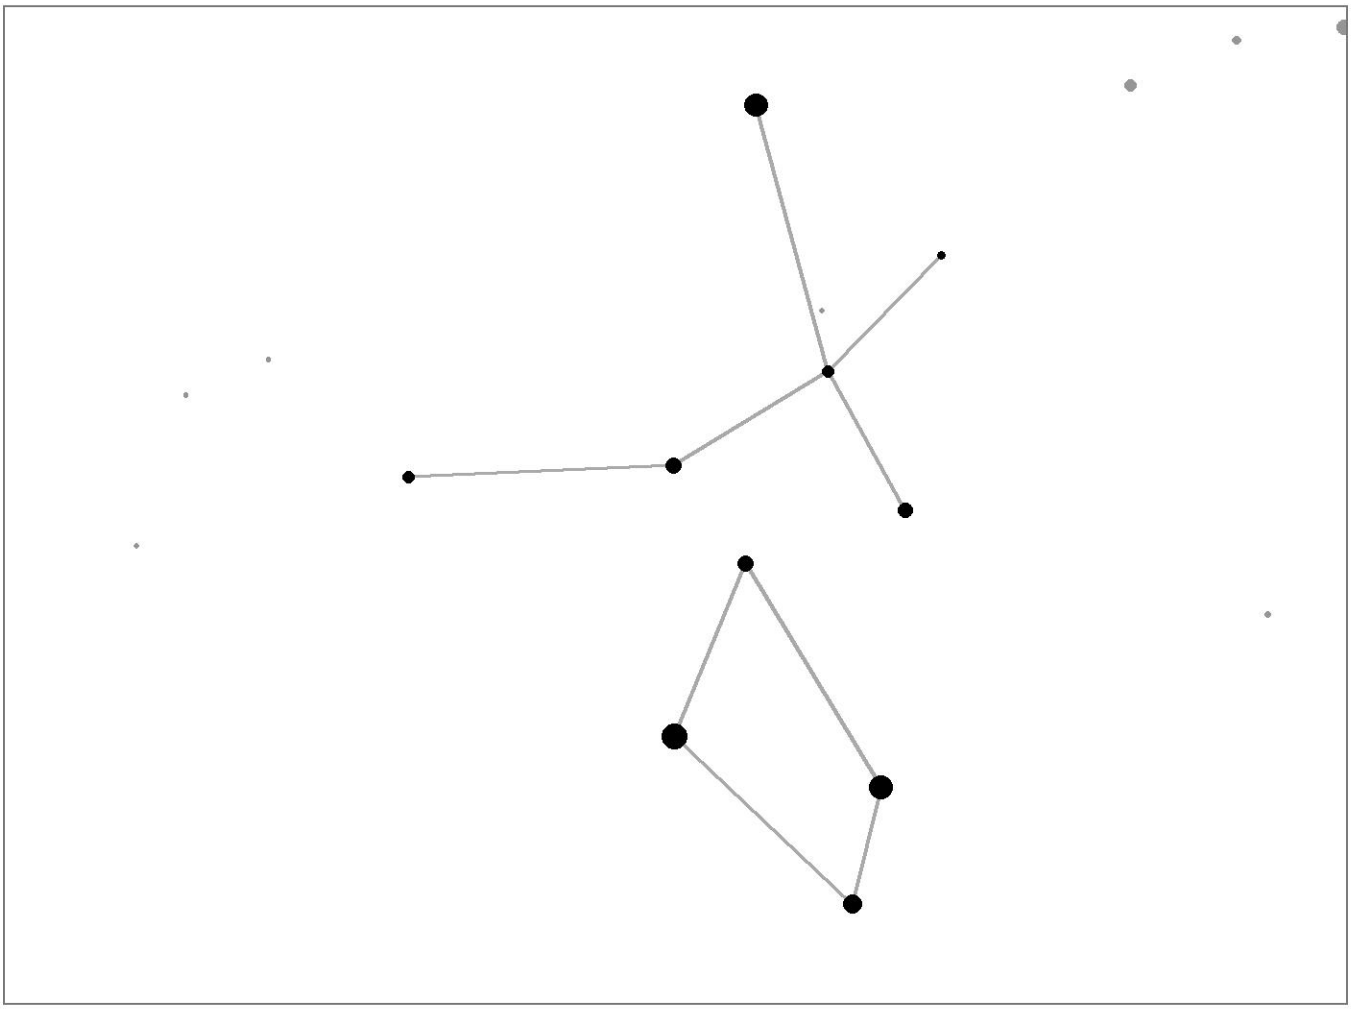

11. The Whirlpool

File: 11-whirlpool.png

Turn this star diagram into a constellation drawing. The Whirlpool: a swirling whirlpool of sea water spiralling down into the deep, following the crooked chain of stars. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

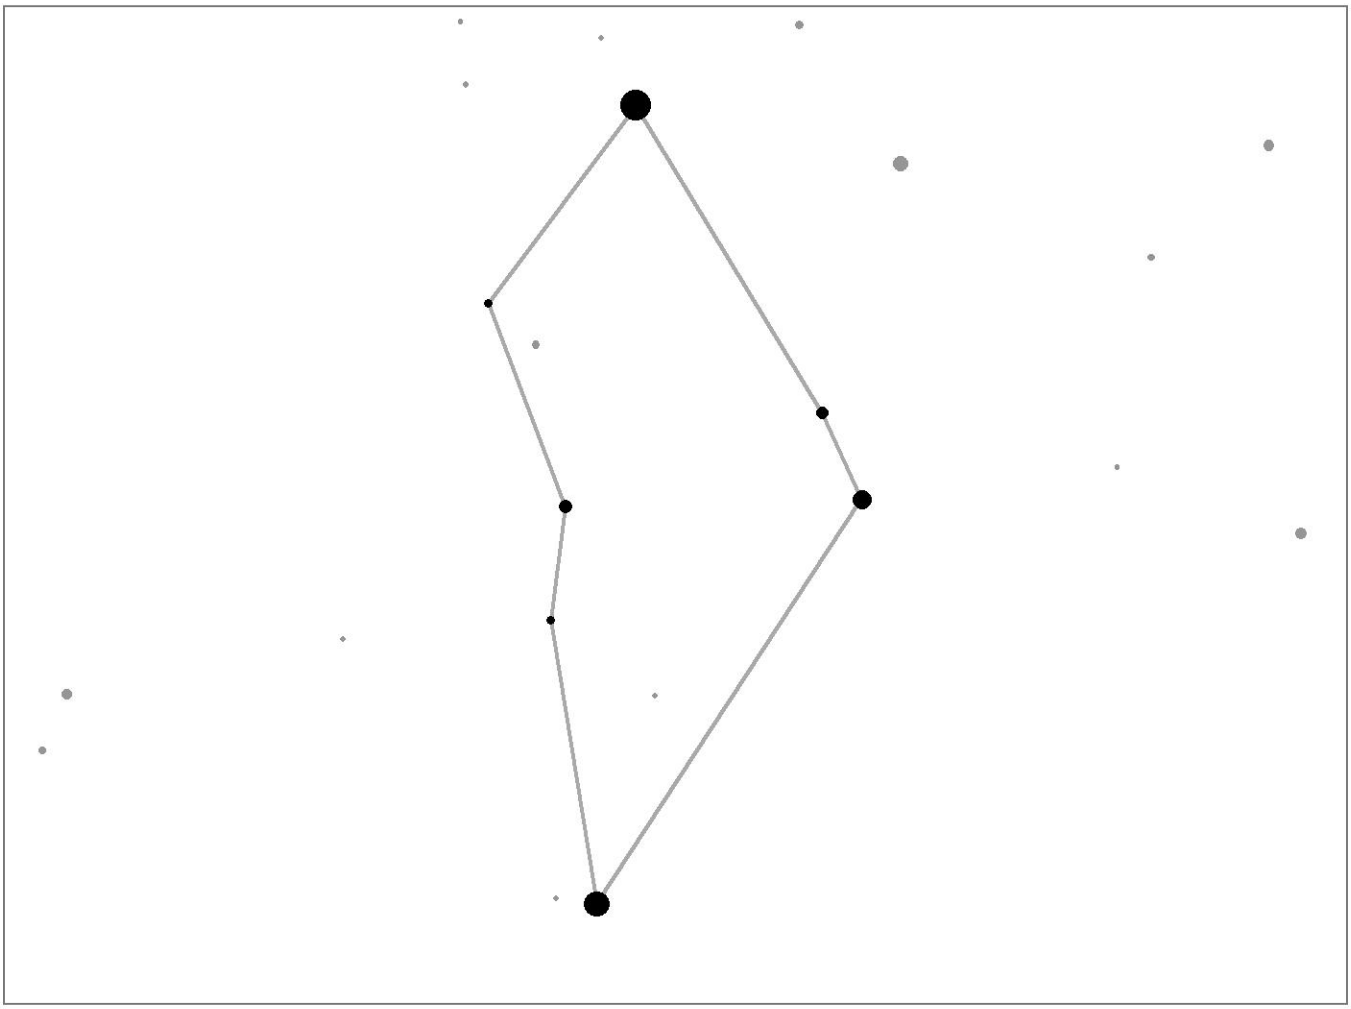

12. The Fisherman and his Net

File: 12-fisherman.png

Turn this star diagram into a constellation drawing. The Fisherman and his Net: an old fisherman standing with his arms spread wide (shouting), and below him his empty, torn fishing net hanging from the four-sided loop of stars. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

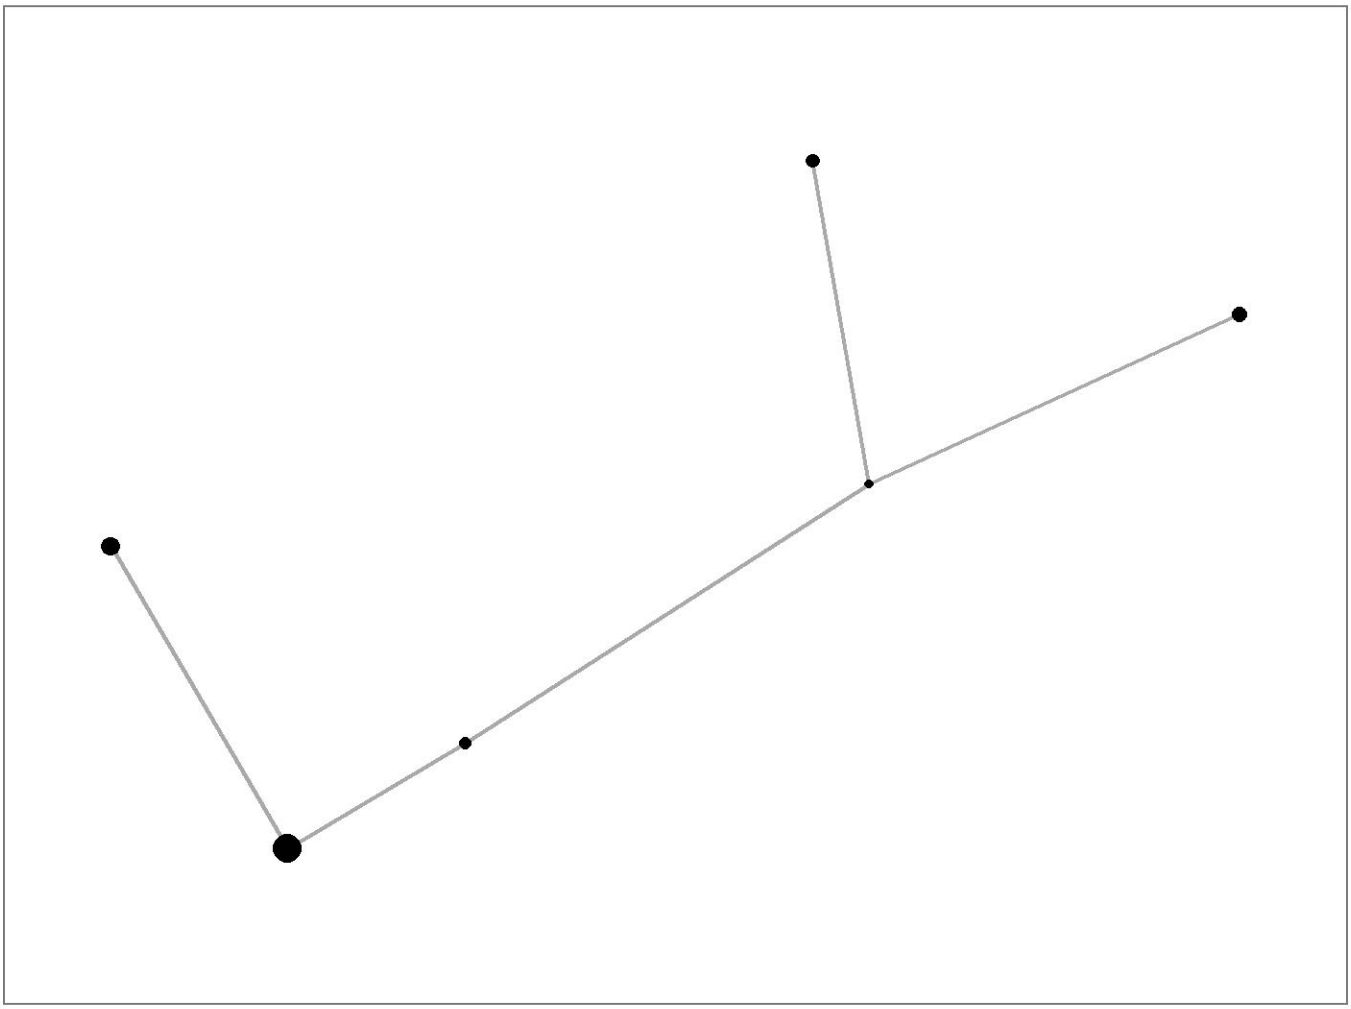

13. The Lug Sail

File: 13-lug-sail.png

Turn this star diagram into a constellation drawing. The Lug Sail: a four-cornered lug sail with its yard, the top corner (peak) at the top bright star, the yard running down from it, the stepped side is the front edge (luff) with reef points, the long bottom edge is the foot.
Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

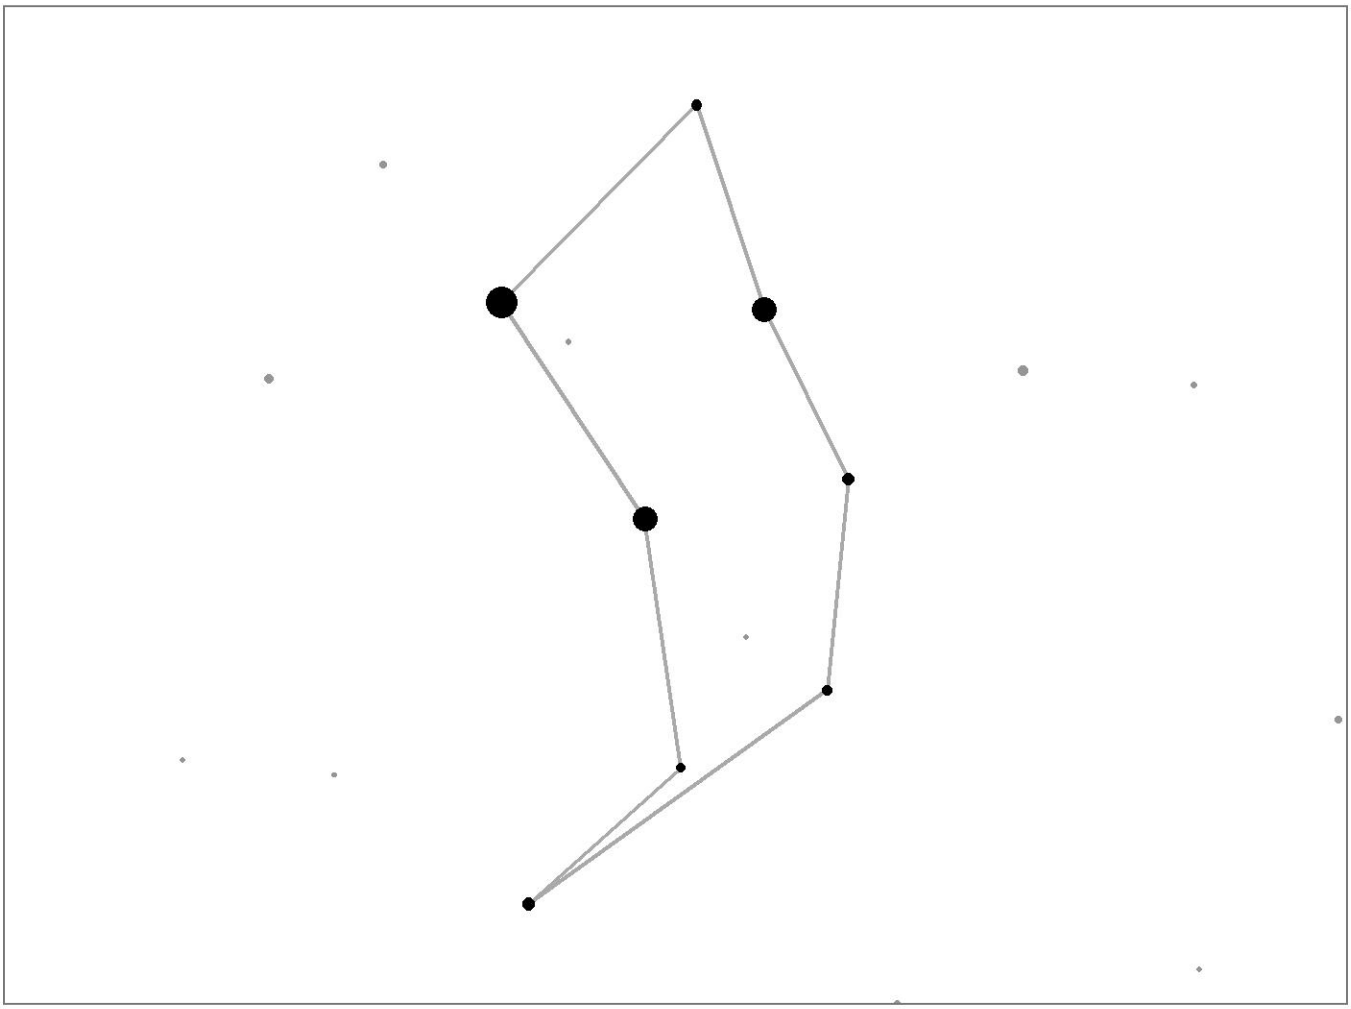

14. The Scorpion

File: 14-scorpion.png

Turn this star diagram into a constellation drawing. The Scorpion: a scorpion; its tail is on the LEFT, curling up into a raised sting at the short line at the far left, and its two claws open wide at the upper RIGHT. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

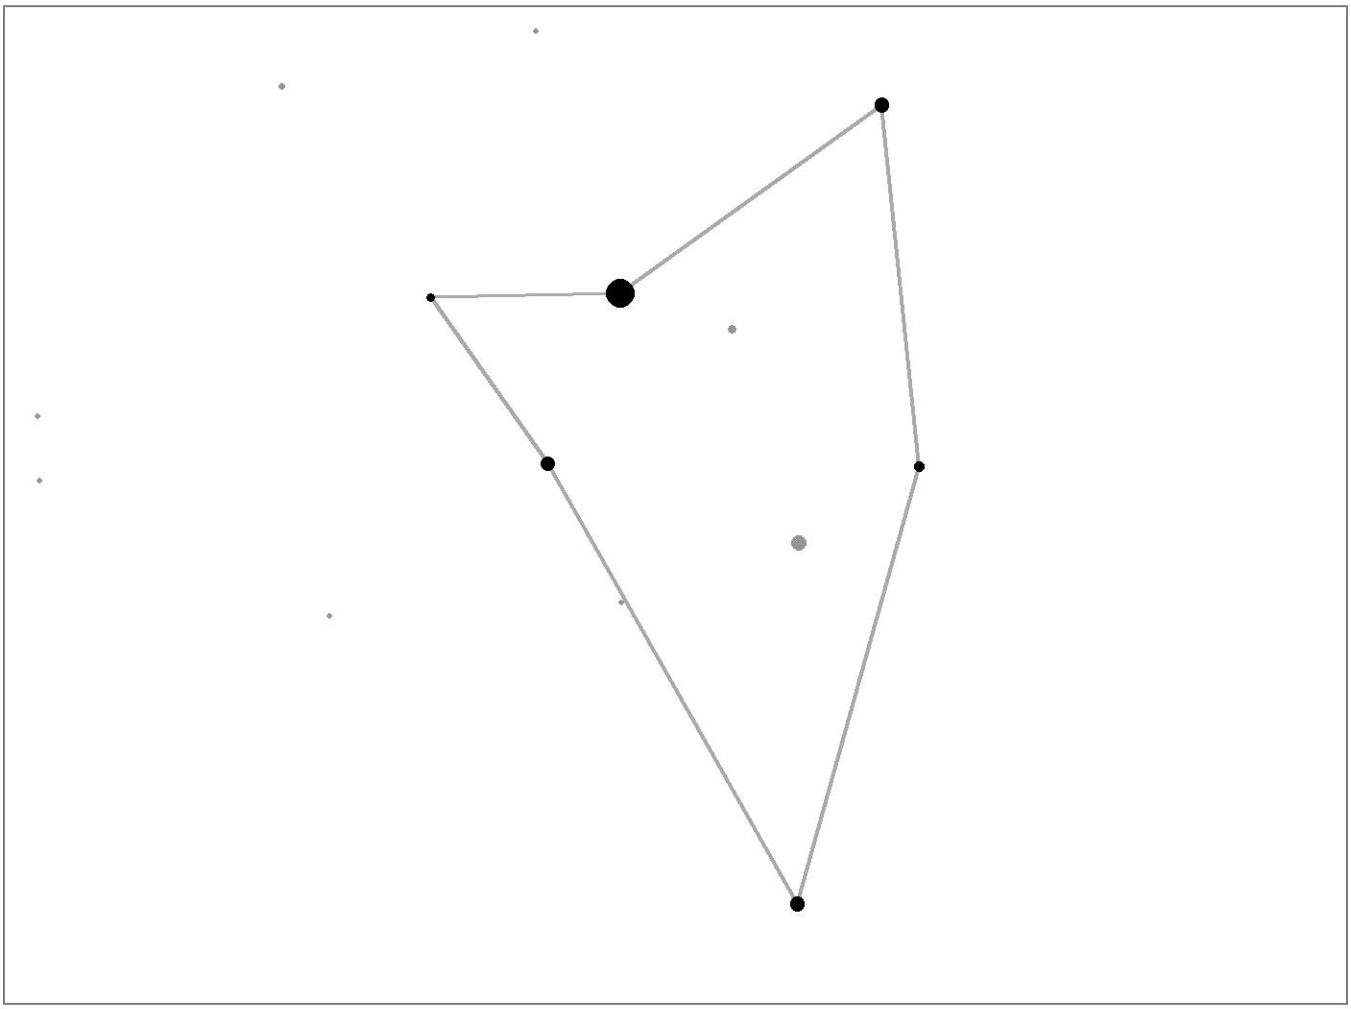

15. The Hunting Horn

File: 15-hunting-horn.png

Turn this star diagram into a constellation drawing. The Hunting Horn: a curved hunting horn made of an animal horn with brass fittings; wide bell at the top, narrow mouthpiece at the bottom, a cord hanging from it. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

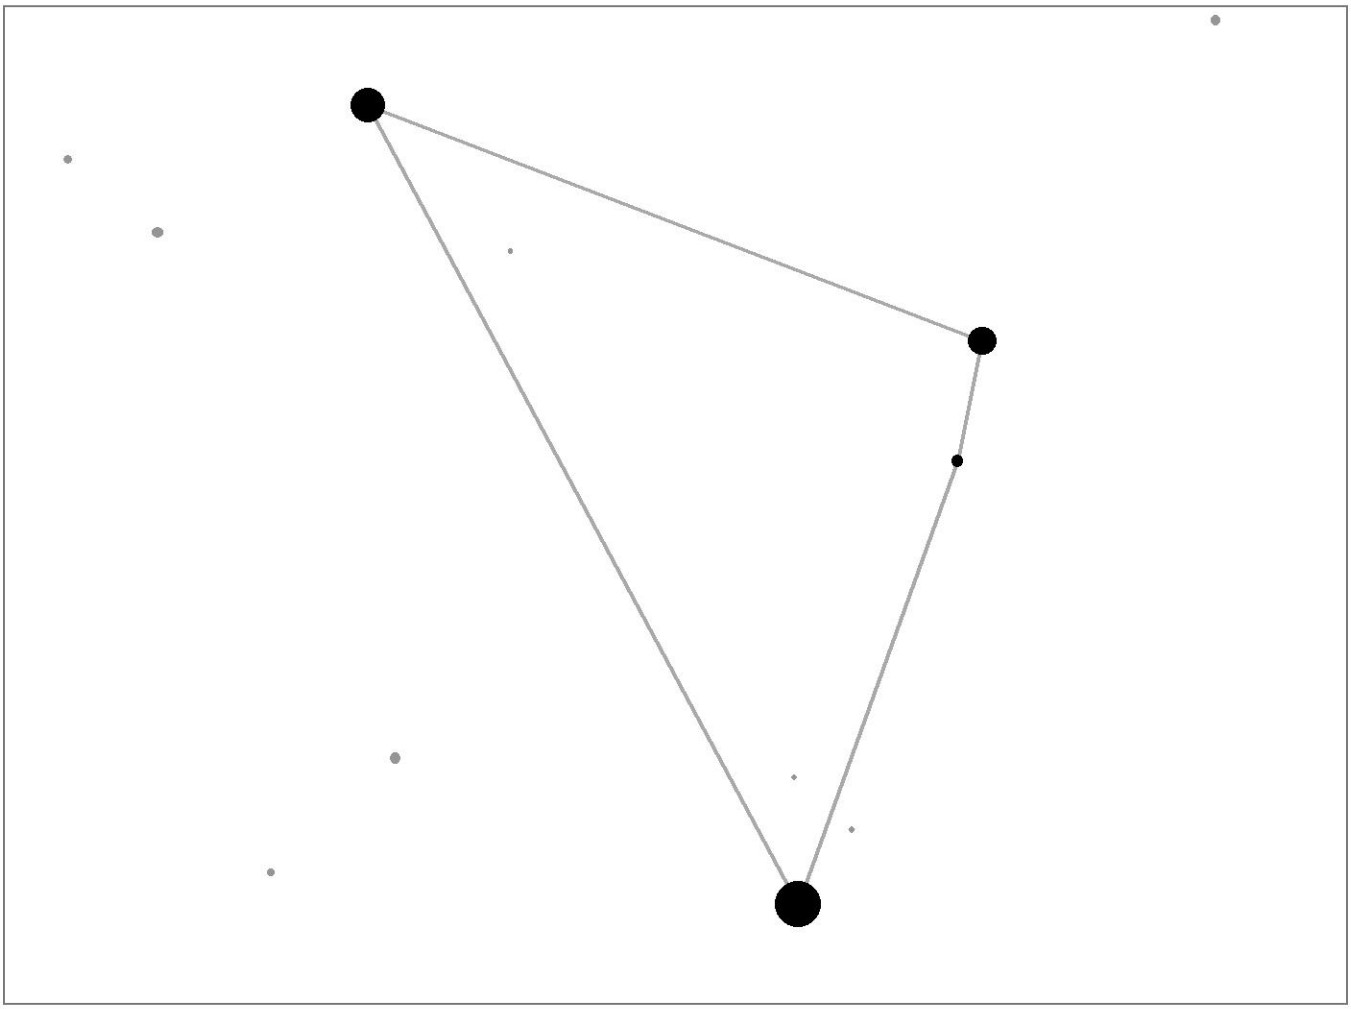

16. The Witch's Hat

File: 16-witchs-hat.png

Turn this star diagram into a constellation drawing. The Witch's Hat: a crooked, pointed witch's hat with a wide brim. In this picture it hangs UPSIDE DOWN: the brim runs along the top, the point is at the bottom. A bit of seaweed on the band. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

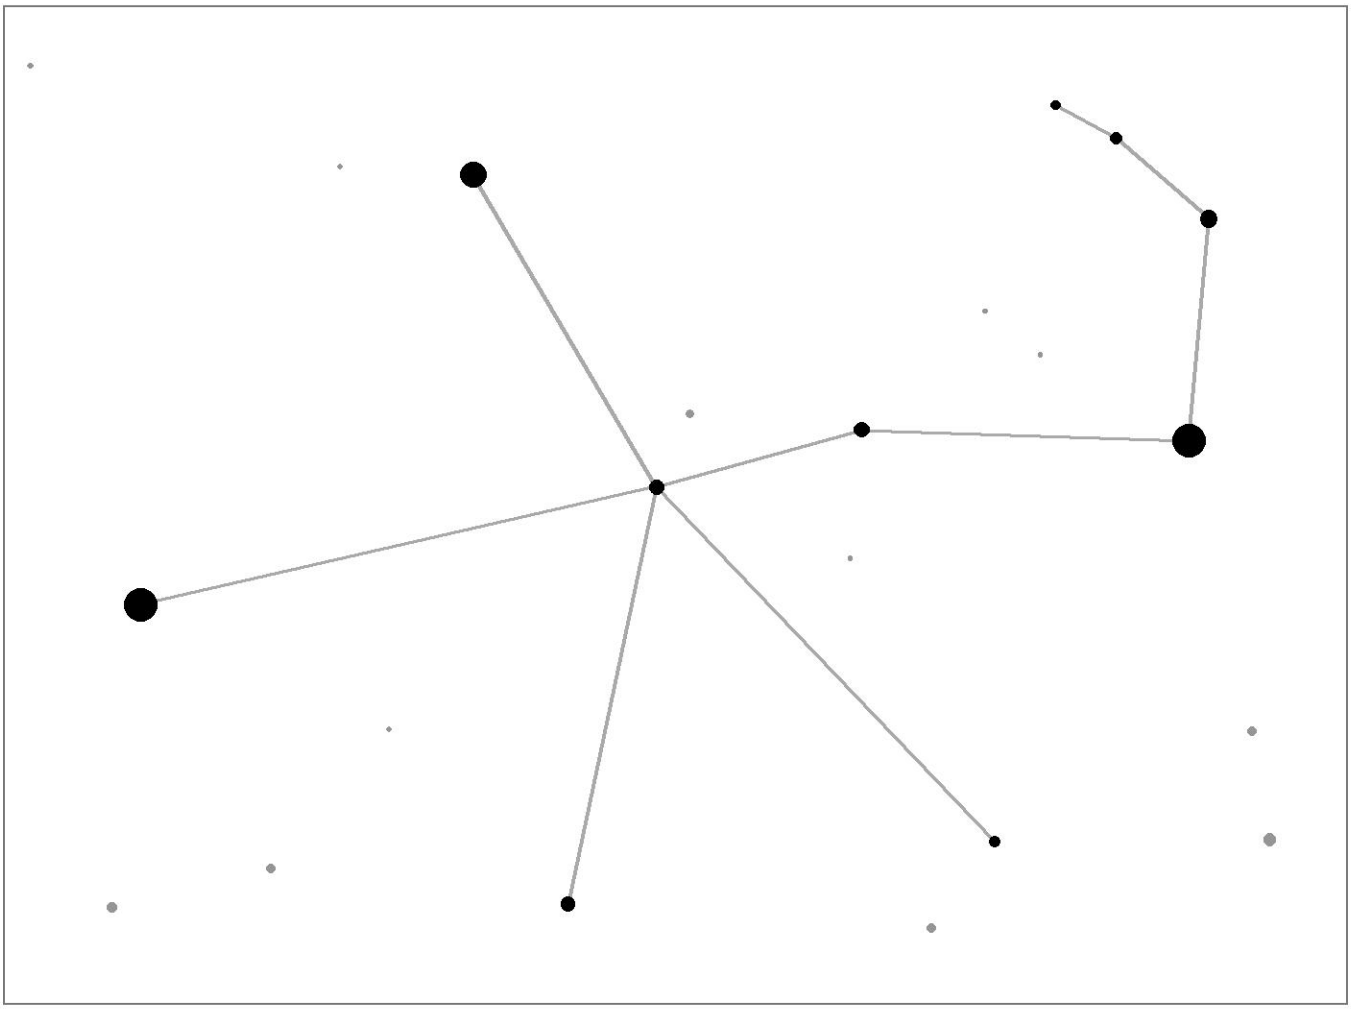

17. The Harp

File: 17-harp.png

Turn this star diagram into a constellation drawing. The Harp: the frame of a tall old harp, the triangle of stars is its frame (pillar, neck and soundboard); strings drawn as fine lines. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

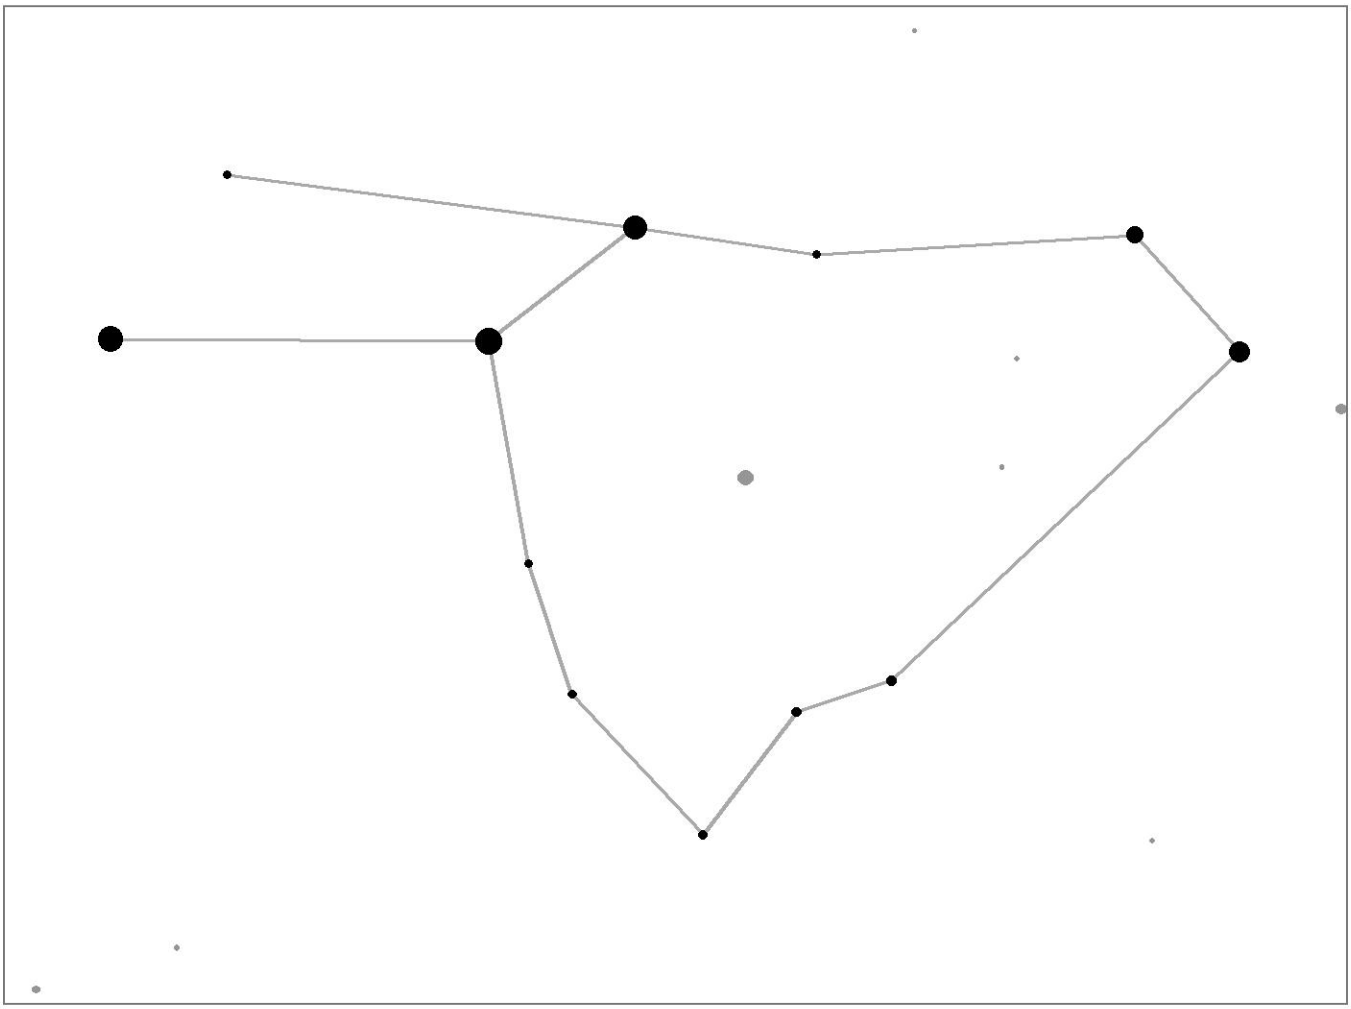

18. The Haymaker

File: 18-haymaker.png

Turn this star diagram into a constellation drawing. The Haymaker: a peasant mower with legs apart, head raised (the star near the top), swinging a huge scythe: the long handle runs right across the figure from the bright star on the LEFT to the bright star on the RIGHT, where the curved blade begins and bends upwards. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

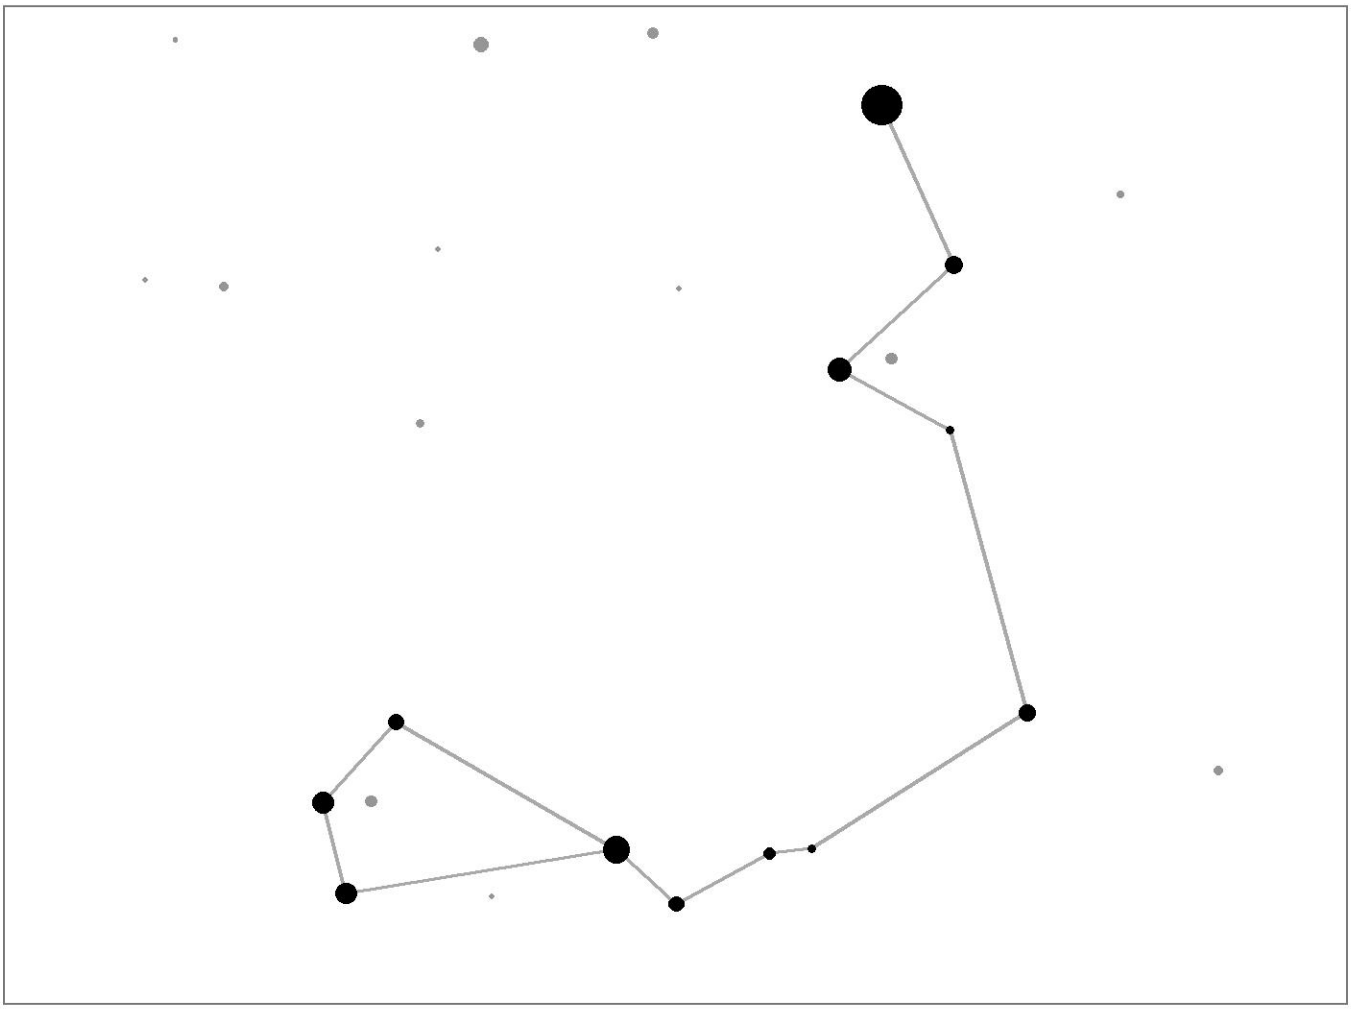

19. The Bull

File: 19-bull.png

Turn this star diagram into a constellation drawing. The Bull: the head of a big bull lowered as if to charge, two long horns both pointing to the LEFT (the two long lines), broad brow along the top, muzzle at the bottom point, and the lone star inside the outline is his eye. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

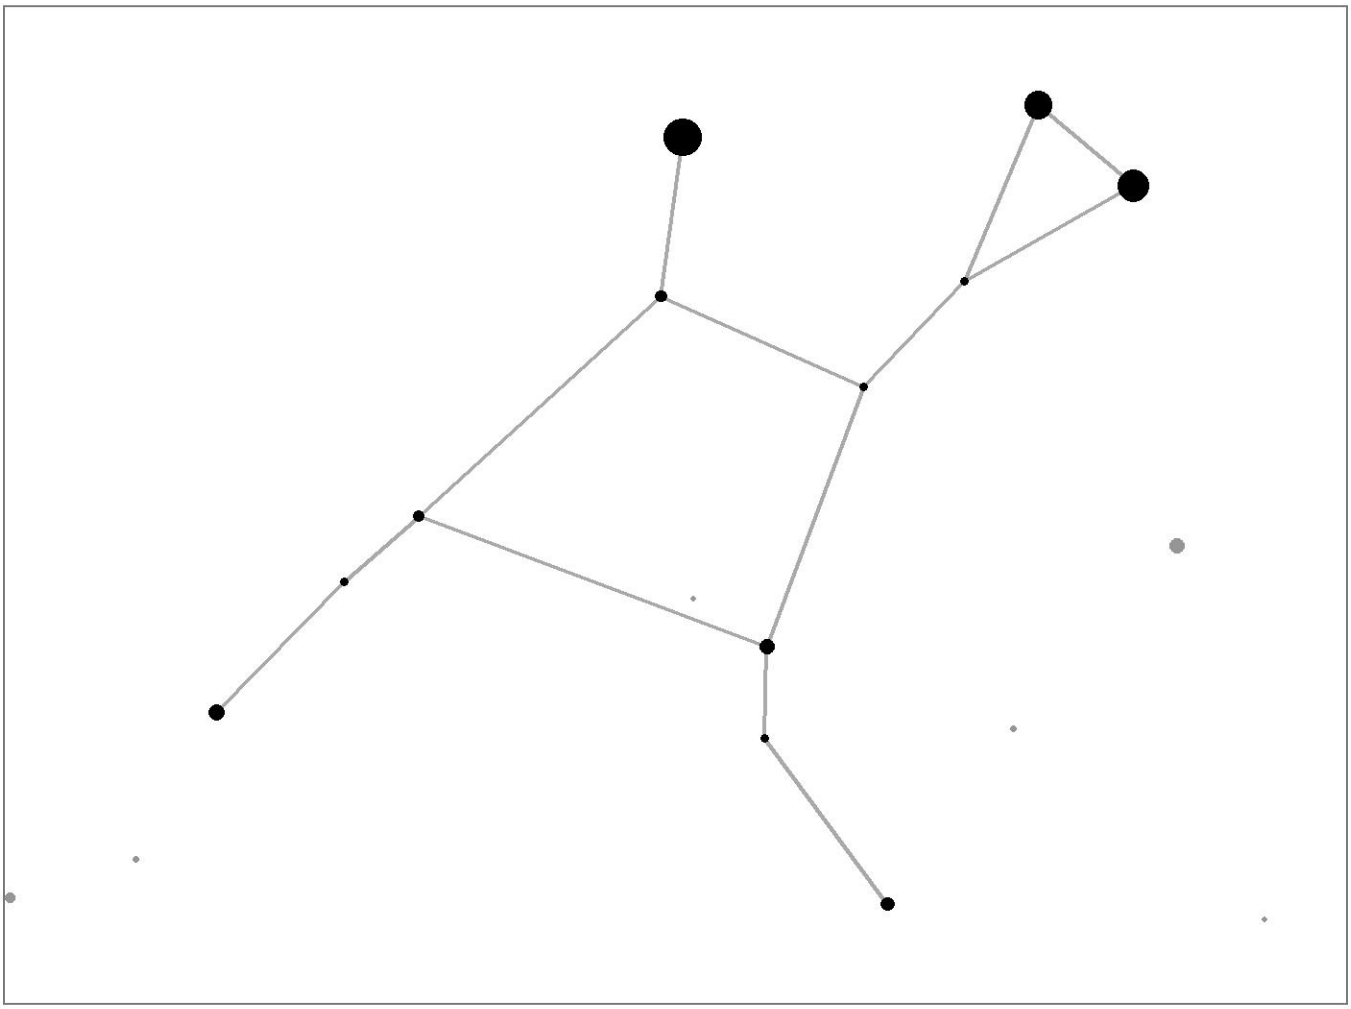

20. The Cobra

File: 20-cobra.png

Turn this star diagram into a constellation drawing. The Cobra: a cobra rearing up to strike. In this picture she is UPSIDE DOWN: the tip of her tail is the bright star at the TOP, her body runs down and curves to the left, and her hooded head (the small four-sided loop) is at the BOTTOM LEFT, ready to strike. Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.

21. The Fiddler Crab

File: 21-fiddler-crab.png

Turn this star diagram into a constellation drawing. The Fiddler Crab: a fiddler crab with a square shell, two jointed legs raised behind, ONE huge open claw (the triangle at the top right) and one small claw at the top left holding a glowing pearl (the bright star at the end of that short line). Style: an old sailor's star atlas, hand-drawn engraving / ink line art in dark sepia, fine hatching, no colour fills, white background, no text, no frame, no extra stars. IMPORTANT: draw the figure AROUND the black star dots. Keep every black dot exactly where it is, the same size, and do not add, remove or move any dot. The grey lines only show how the stars are joined and may be covered by the drawing. Keep the image size and composition unchanged.
